SUMMARY

- Full-stack developer with advanced understanding of Javascript and Node.js/NPM packages
- 6+ years of experience as a healthcare professional/Certified Athletic Trainer
- Eager to bring my solution-oriented and innovative mindset to an ambitious and passionate role
- Experienced communicator as a team leader, teacher, presenter and patient care provider
- Desire to always learn, comfortable in fast-paced environment and committed to delivering results
- Known for attention to detail, problem-solving skills and integrity

TECHNICAL SKILLS

Javascript	Object-Oriented Programming	React	Node.js	Express	jQuery
SQL/MySql	NoSQL/MongoDB	RESTful APIs	CRUD functionality	HTML	CSS
Bootstrap	Materialize	Git	Version control	Heroku	Agile development

APPLICATIONS/PROJECTS

Self Care Central - This full-stack app is your one stop shop for all self-care goal setting and tracking needs. As project manager, I used an agile approach with daily stand-ups and Kanban. On the back-end I created the MySql server models and routes for full CRUD functionality using Node.js/Sequelize ORM. On the front-end, I fetched, manipulated and rendered data, created forms and handled submission, and implemented React-hooks.

Booklastic – Come write a review or find your next book inspiration! This app was created with Node.js as a space for book lovers to bond. My roles in this group project include SQL database creation, RESTful API routing, client-side Javascript, Handlebars, and error handling. Check out the Socket.io chat feature!

Wiki-On-Bored – A Materialize-interfaced activity suggestion generator that utilizes third party APIs. My responsibilities include fetching data with query parameter manipulation, click handling, DOM manipulation with dynamically created elements, local storage, Kanban oversight and Git Administrator.
